

# New SharePoint 2010 Seminar Series

## Demystifying SharePoint 2010 Learn how SharePoint 2010 can make your job easier

Book a front row seat as four industry experts discuss the straight scoop on the ins and outs of SharePoint 2010.

- *Find out what are the hot new features, fixes and capabilities*
- *Know the pros and cons before you begin migration*
- *Get helpful, practical information and tips on what's possible now*

**March 18 – 9 am to 12:00pm (ET)**

### Developing with LINQ to SharePoint 2010

**Speaker: Steve Fowler**

SharePoint 2010 has improved ways to work with data. LINQ to SharePoint lets developers work with data from SharePoint lists in a strongly typed way that preserves relationships between lists. This session will demonstrate how to write code that uses LINQ data.

#### Who Should Attend

Developers, Administrators, Architects

**March 18 - 1:00 pm to 4:00 pm (ET)**

### Migrate to SharePoint 2010 - Stress Free!

**Speaker: Nick Kellet**

Considering migrating your current SharePoint environment to SharePoint 2010? Worried about what's involved and how to manage it? Don't let it become a headache! This session will discuss some common sense business and technical approaches to take away the pain, and help you deliver your SharePoint 2010 migration project on time and on budget.

#### Who Should Attend

SharePoint Administrators

**March 19 - 9:00 am to 12:00 pm (ET)**

### SharePoint 2010 Branding

**Speaker: David Sterling**

This will be a walkthrough of the various methods used to modify and change the look and feel of SharePoint Sites. It will include manipulation of master pages, updating styles and using SharePoint designer to create pages. In addition, it will cover the creation and deployment of custom controls in Visual Studio.

#### Who Should Attend

SharePoint Designers and Developers

**March 19 - 1:00 pm to 4:00 pm (ET)**

### Business Intelligence with Microsoft SharePoint Server 2010
